

The Snake-of-the-Day headliner of this web site features photographs that we believe will interest our web site visitors. Each daily photograph will be posted at 11:00 am. central (GMT - 5) and replaced in 24 hours. Feel free to make **suggestions** regarding what snake photographs you would like to see in this daily feature. The animals pictured here are not for sale, unless otherwise noted, but you can find available surplus snakes for sale on the **Surplus Page** of this web site. We appreciate your patronage and welcome any **suggestions** you may have.

This young female with her eggs shows one of several **Terrazzo** egg clutches we have in the incubator now. The sire of this clutch has precious little striping so some of the hatchlings from this pair should have greatly reduced pattern; like the Terrazzo namesake (formerly known as the *Granite* Corn Snake). Terrazzos are expected to begin hatching in early July.
