

The Snake-of-the-Day headliner of this web site features photographs that we believe will interest our web site visitors. Each daily photograph will be posted at 11:00 am. central (GMT - 5) and replaced in 24 hours. Feel free to make **suggestions** regarding what snake photographs you would like to see in this daily feature. The animals pictured here are not for sale, unless otherwise noted, but you can find available surplus snakes for sale on the **Surplus Page** of this web site. We appreciate your patronage and welcome any **suggestions** you may have.

Part of a brood of Palmettos the DAY after their first shed. Note that very little color is demonstrated at this age, but in the coming weeks and months, slowly, colors that are now visible will saturate, and new red smudges will appear where there was previously no color. Their pinkish ground coloration will change to stark white.
