

Show & Tell

Adult Striped FIRE (Amel Bloodred) corn snake. Most Striped Fire mutants exhibit virtually no pattern as adults, making them desirable for creating visibly pattern-less corns, but this one *barely-but-tastefully* exhibits classic striping. A Striped corn should be striped or have no pattern at all *IMHO* ? Even though pattern fades to sometimes being essentially gone in striped mutant corns, if I am going to see SOME pattern, I prefer stripes over spots and broken lines.
