

The Snake-of-the-Day headliner of this web site features photographs that we believe will interest our web site visitors. Each daily photograph will be posted at 11:00 am. central (GMT - 5) and replaced in 24 hours. Feel free to make **suggestions** regarding what snake photographs you would like to see in this daily feature. The animals pictured here are not for sale, unless otherwise noted, but you can find available surplus snakes for sale on the **Surplus Page** of this web site. We appreciate your patronage and welcome any **suggestions** you may have.

This Charcoal Palmetto shows promise for what we expected; *freckles* that are all shades of gray and black. It could be that unlike typical Palmettos that only show perhaps 1/3 of their colors as hatchlings — and show more of them as they mature — maybe the Charcoal Palmettos show all of its markings from DAY-one? Since this is the first of its kind, we'll just have to find out as she matures. It definitely is obvious that she is showing many more color flecks than typical Palmettos of this age.
