This 2016 female 21" Pied-sided Bloodred corn snake is currently eating large frozen/thawed pinky or small f/t fuzzy mice. I'd call her a medium-white Pied-sided Bloodred though she may seem to have low-white-expression because photographing all of the white on these mutant compounds is difficult, if not impossible. Her \$155.00 USD price includes Her price is lower than most medium-white P/S Bloods because she snapped at me several times during the photo shoot this evening. What a grouch?! **ADDITIONAL PIC . . .**
