

Show & Tell

This brood of corns is from the pairing of an Ultramel Tessera to a High-white Reverse Okeetee (female Tessera owned by Catherine Turley) show-at the time of this photograph-before all of the eggs had hatched; Ultramel Tessera, Ultramel Ghost Tessera, Ultramel Anery Tessera, Snow Tessera, AND if you look in the lower left corner, what appears to be an Ultramel Ghost that's NOT Tessera.
