

Show & Tell

Which corn snake is not related to the others? One is the product of pairing an eXtreme Reverse Okeetee with a High-white Reverse Okeetee. The other two are from eXtreme Reverse Okeetee X same. No idea how the eXtreme High-white Reverse Okeetee will look at maturity, but I look forward to breeding two of the best white ones together when they are mature? Then, putting Tessera into that family tree. **BONUS PIC . . .**
