

## Show & **\$ell**

{product id=800}

This 2014 female aberrant *Buf Tessera* corn snake has a lot to offer corn snake breeders. Because both of her obvious mutations (Buf and Tessera) are dominant to wild-type, both can be demonstrated in the first generation progeny of breeding this snake to another. No waiting two generations to see target product. Her \$425.00 price includes She is also 50% possibly het Amel and I particularly like the wide and contiguous stripe on her tail (barely visible in this pic). **Bonus Pic . . .**
