Like her sister featured on S.O.T.D. three DAYS ago, this 2014 female aberrant *Buf Tessera* Corn snake has a lot to offer corn snake breeders. Because both of her obvious mutations (*Buf* and *Tessera*) are dominant to wild-type, both can be demonstrated in the first generation progeny of breeding this Corn to any other Corn. No waiting two generations to see target product. Her \$425.00 price includes She is also 50% possibly het Amel.
