{product id=810}

This 27" 2013 Saffron (Sunkissed Butter) Motley female is currently eating one frozen/thawed fuzzy mouse per week. She recently rubbed the top of her head on a burr I had not noticed around an air hole in her cage, but such superficial sores heal quickly. In two more sheds, the sore that is visible in this picture will be scarred over, and fortunately, scars on Butter corn snakes are white. Her \$250.00 USD price includes **Bonus Pic . .**
