

Show & Tell

Two 2014 corn snake hatchlings that are Het for Scaleless. We will never shy away from reminding that the Scaleless Corns are not pure corn snakes (even though we'd all be shocked to discover that many of the corns in the hobby toDAY owe some degree of their looks to alien species). Pictured is a Het Scaleless corn from the pairing of a Scaleless Extreme Okeetee from SMR stock in France to a SMR Extreme Okeetee AND the other from the pairing of the same Scaleless SMR Extreme Okeetee with a SMR High-white Reverse Okeetee. Q: Is the "Miami-looking" one the colorful result of its "Emory's" ancestry? A: Partially, yes. Read below . . .
