

## Show & Tell

From two corns het for Striped Sunkissed Caramel (Striped Honey) these Honey, Sunkissed, Amel Sunkissed, and Honey Motley 2016 hatchlings will be listed for sale after they have voluntarily fed three consecutive times. They are now only nine DAYS-old, so it will be a couple more weeks before we will certify them for shipping. Only 8% of our 2016 eggs have hatched thus far, and most of the remaining eggs won't begin hatching for another month (we're still getting eggs daily).
