

Snow Tessera from the pairing of a Tessera Het Snow and a Salmon Snow Motley.

On SMR's FaceBook page toDAY, I featured the left-pic Snow Tessera, but mistakenly titled it BLIZZARD. Hence, I'm correcting that error with the right-pic showing a Snow Tessera and a Blizzard Tessera. When I set out to make Blizzard Tesseras, I didn't want to create Blizzard Tesseras with virtually no obvious pattern, so I used the most yellow Blizzard corn I had. Not what someone would normally do when reproducing quality Blizzard corns, but I think the amount of Yellow in the finished product ehances it's beauty via the yellow pattern.
