

Show & Tell

A long term project at South Mountain has been to alter classic corn snake markings into bands, toward the goal of annulated (ringed) corn snakes. Here are two examples (pic 1 and 2) of amelanistics that are getting closer to our goals; Banded Fluorescent and Banded High-white Reverse Okeetee. Pic 3 toDAY is borrowed from Glen Brooksi showing one of his stunning Banded Fluorescent corns. Congratulations, Glen.
