

SHOW & TELL

2013 Amel corn Het for Cinder (one parent was a Peppermint-aka: *Amel Cinder*). Most Amels that are het for Cinder have a look that Cinder breeders recognize as *markers* for being het Cinder. Of course, just seeing an Amel like this is no guarantee that it IS het Cinder, but it's handy to have indicators when culling possibly non-Cinder Amels from Het Cinder broods. S . . .
