

Show & Tell

These 2016 Scaleless corn snakes (one Butter and one Common) hatched September 7th. After a shed and a few meals they will be offered for sale.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake) and are therefore technically inter-species hybrids.
