{product id=1775}

There is more than meets the eye about this 11" female 2017 Snow Tessera since her parents were a Tessera het Scaleless and a Snow with deeply yellow markings. Those parents gave her the genotype of being possibly-het Scaleless and the potential to give her Snow progeny deeply yellow markings. She is currently eating frozen/thawed pinky mice. His \$335.00 price includes 11-25-17 UPDATE: Now 13" long.
