

Show & Tell

Three pix of only four progeny from a next-generation pairing of two Cayenne Fires related to the South African Line. I was surprised to see the Snow, since I had never seen one from these two snakes when bred to different mates in the past. Parents are Cayenne Fire x Same. **S**

< style="font-size: 12.16px;" />

Three of the four Cayenne Fires that hatched on October 11, 2016.

Fourth *and last* one in this brood to hatch on 10-12-16 was this Snow Cayenne Fire. How it will look at maturity is anyone's guess?
