

\$OLD!

2013 female Buf Tessera Corn Snake. She really packs a genetic punch via being a homozygote of two gene mutations that are dominant to wild-type, Buf and Tessera. Therefore, breeding her to ANY male corn snake will render some Bufs, some Tesseras, some Buf Tesseras and whatever other mutations are common to both parents. She is 30" long, eating frozen/thawed hopper mice. Her \$450.00 usd price includes **\$OLD!**
