

Show & \$ell

{product id=1512}

Now 14" long, this female 2016 Heliconia (Red Factor Specter) corn is currently eating frozen/thawed pinky mice. Heliconia is a name assigned by Donovan Winterberg for Specter morphs that are also Red Factor. As far as we know, only two gene mutations exist in this corn; Anery and Red Factor (perhaps Hypo also)? Her \$165.00 usd price includes
