

Show & \$ell

This 2014 male Corn Snake is HET Scaleless Sun glow Motley. From the parents, Sun glow Motley X SCALELESS Extreme Okeetee, this sub-adult is already eating frozen/thawed hopper mice. If he stays here, he will be on the 2016 SMR breeding roster. His \$375.00 USD price includes We have several 2015 corns for sale now that are het for Scaleless and other mutations. Inquire about varieties and availability. Their prices are considerably lower than this sub-adult. ALL Scaleless corns in the hobby toDAY (including scaled corns that are carriers of Scaleless) derive from the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake) and are therefore technically inter-species hybrids.
