This 2010 female Granite Corn Snake (Anery Bloodred) is the second generation product of pairing a Snow Corn with a Rosy Bloodred (aka: Kastanie Bloodred). Therefore, in addition to being a Granite, she may also be a Kastanie. Only breeding trials will reveal this. She is scheduled to be brumated next week, for February 2013 breeding.

The U.S. Dollar bill in the picture is for size and color comparison. Every computer monitor renders different colors so we put this slightly used dollar bill in the picture so you can hold one next to your computer to assess the color of the snake. This snake is in good health (not under or over-weight, no parasites or diseases that we are aware, no injuries or defects, and routinely feeding on unaltered frozen/thawed mice).

If we have noticed that the snake listed has any temperament or behavioral issues other than human-friendly, it will be detailed in Comments above.
