

## Show & Tell

The cage labels for the parents of this corn snake (and also the second corn snake toDAY) were labeled from the owner SPECTERS, so, I'm left to wonder if we'll ever be able to distinguish between Specters and Helionias (latter is supposed to be Specter + RedFactor)? Since I have seen so many Specters without any traces of pink, it seems logical to me that we should call the ones without pink, SPECTERS and the ones with pink, HELICONIAS.
