{product id=1651}

This 2016 male Snow Tessera is actually a Visual-het Salmon mutant (possessing only one of the paired gene copies to make Snows pink- or coral-colored). Pairing this Snow with another Salmon-visual het or with a Salmon homozygote will render some heavily coral- or pink-colored Snow Tesseras. He is currently eating frozen/thawed large pinky mice. His \$245.00 USD price includes
