{product id=1240}

This 19" male Striped Motley Sunrise Amel corn snake is possibly-het for Stripe and is currently eating frozen/thawed large pinky mice. His \$185.00 price includes Via the Sunrise mutation, red colors will continue to saturate with age and within the coming year, some of the scales bounding pattern zones will randomly and sparsely begin to de-pigment to white. Such de-pigmentation of random scales seems to increase in volume for the duration of the snake's life.
