

Show & \$ell

{product id=2157}

This 29" male 2017 Tessera corn snake is possibly het for Scaleless Anery, since both parents were het for those mutations. He is currently eating frozen/thawed large fuzzy mice. \$165.00 plus \$39.00

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
