

42613-092713

Tessera

Male

d.o.h. 2011

32" long on August 25, 2013

\$250.00

Comments: This male is the progeny of an Okeetee and a Tessera (no known hets). He does not like people. If you're looking for a breeder (vs. a corn the kids shouldn't be handling) and breed him to congenial females, you may not have any/many babies from him with his grouchy demeanor.
