2009 female Tesseract Corn Snake HET Striped Ghost. 46" long, eating frozen/thawed adult mice. She is a great breeder, but we have too many such breeders at this time. She emerged from brumation in August, but we have decided not to breed her right now (we'll brumate her again next month and breed her in 2015 if she does not sell now). If you have a male that's not in brumation, she could be ready to breed now as she does appear to be showing small eggs. Since she was not bred since last year, she COULD lay eggs from retained 2013 sperm, but fertility in such cases is traditionally low. Her \$450.00 USD price includes shipping to an of the lower-
