

S O L D

This 2011 female has unknown hets (around here, she has to be het for something relatively cool) because her ID fell off her cage when she was young. She is 36" long and now eating frozen/thawed adult mice. If nobody buys her, she will be bred to some male here at SMR in 2014, just to start the proces of discovering what genes she's hiding from us. \$135.00 includes

U.S. FedEx Overnight shipping to the lower 48 contiguous United States.
