

Show & \$ell

This 2015 male Zagtec Blizzard (and/or Snow) is more than you see. These DAYs white snakes can sometimes be relatively boring, compared to their brightly colored counterparts, but if you cite the birth name of Snows and Blizzards, respectively, Amel Aneries or Amel Charcoals, this snake has the potential to reproduce several colors. Siblings of this snake included Snows and Blizzards, so which he is (or both) I'm not inclined to declare-by sight. Suffice it to say, her innate value in the realm of breeding is that she can reproduce Amel Zagtecs (hybrid name for ZigZag and Aztec-neither of which they truly are) this pattern is not the result of a gene mutation, but from polygenetics (interactions/variations of multiple common genes). He is now 15" long, eating frozen/thawed pinky mice. His \$155.00 USD price includes
